DENOMINATIO STELLARUM.			Longitudo G.M.S.	Latitudo G.M.	Magnitudo	DENOMINATIO STELLARUM.			Longitudo G.M.S.	Latitudo G.M.	Magnitudo
Quæ in dorso seu medio corpore	15.49	f	41.5	f	A 3	Quæ in collo præcedit	11.51	f	11.5	f	A 6
In armo sinistro	14.6	f	43.57	f	3	Sequens in eductione colli	14.41	f	13.5	f	4
Australior duarû in post. pedibus	19.21	f	45.49	f	3	Media colli, & præcedens trium in nexu	20.11	f	15.0	f	5
Boreohor earundem	21.36	f	44.18	f	3	Boreatrium in flexu colli	22.4	f	14.17	f	4
Præcedens in dorso	20.26	f	38.16	f	4	Australis in nexu	19.53	f	16.46	f	5
Sequens in dorso	23.27	f	37.40	f	4	Lucida Hydræ, sive cor	21.45	f	22.24	f	1
Ultima in cauda	* 26.22	f	38.26	f	A 4	Quæ proximè cor sequitur	27.12	f	26.33	f	4
<b>CANIS MAIOR.</b>						Quæ hanc deinde sequitur	0.9	f	26.12	f	5
In ore splendidissima, Sirti vocata	8.35	f	39.30	f	A 1	Præcedens ex duabus contiguis supra hanc	2.48	f	23.13	f	5
Quæ in fronte ad dextram aurem	19.1	f	34.50	f	4	Sequens earundem	3.53	f	21.51	f	4
In media fronte	11.27	f	36.43	f	5	Quæ à corde quinta est	9.31	f	24.38	f	4
Quæ sub sinistra aure	14.6	f	38.2	f	3	Quæ in recta cum hac & sequens	12.41	f	23.31	f	5
In collo	12.3	f	39.30	f	4	Cratera proximè præcedens	14.51	f	21.48	f	4
In armo dextro anteriorû pedum	6.32	f	42.12	f	5	Informis, caput proximè præc.	* 4.45	f	12.27	f	4
Quæ in extremitate pedis prioris	1.42	f	41.18	f	2	Sub basi Crateris, borealis	23.1	f	25.36	f	4
Quæ in dorso	15.30	f	46.9	f	5	Australis	23.49	f	30.17	f	5
Media in pectore	12.36	f	46.39	f	5	Sub cauda Corvi	21.24	f	13.43	f	3
Quæ in ventre	17.55	f	48.30	f	3	Hanc præcedens parvula	19.24	f	14.37	f	6
In ventre inter posteriora femora	15.21	f	51.24	f	3	Informis ante caput Hydræ	* 28.44	f	10.19	f	A 3
Inferior dextri pedis priorum	1.7	f	51.46	f	3	<b>CRATER.</b>					
Quæ in cauda	24.11	f	51.24	f	A 3	Quæ est in basi crateris	18.13	f	22.41	f	A 4
<b>CANIS MINOR, PROCTON.</b>						Sequens duarum in medio	23.43	f	19.39	f	4
In collo	16.39	f	13.33	f	A 3	Præcedens earundem	21.10	f	17.25	f	4
In femote, Procyon	20.18	f	15.57	f	2	Præcedens duarû supra craterem	20.27	f	13.10	f	4
Supra lucidam colli	16.49	f	12.51	f	6	Earum sequens	23.2	f	11.17	f	4
Informis supra hanc	16.42	f	9.46	f	6	Præcedens duarum infer. Pif. 16	28.30	f	18.10	f	4
Sequens ad caudam cancri	20.57	f	10.19	f	A 5	Sequens in medio crateris	0.33	f	16.2	f	4
<b>ARGO NAVIS.</b>						<b>CORVUS.</b>					
Quæ in suprema puppi	5.53	f	43.18	f	A 3	Quæ ad oculum	6.8	f	19.39	f	A 4
Suprema clypei navis	0.35	f	44.58	f	3	Præcedens duarû superiorû in □	5.13	f	14.25	f	3
Præcedens clypei	28.0	f	47.28	f	3	Sequens earundem	7.55	f	12.7	f	3
In velo	4.6	f	32.7	f	4	Sequens inferiorum in quadrato	11.49	f	17.59	f	3
Informis ad Austrum	4.27	f	38.31	f	4	In rostro	6.38	f	21.46	f	4
In Malo trium inferior	12.26	f	32.56	f	6	In collo	8.14	f	18.14	f	5
Supra hanc	12.51	f	30.18	f	4	In sinistra ala supra lucidam	8.21	f	11.28	f	A 5
Hac ipsa altior	10.1	f	24.29	f	4	<b>CENTAURUS, CHIRON.</b>					
Duarum in Antenna præcedens	29.26	f	21.39	f	4	In capite de quatuor australissima	1.27	f	21.49	f	A 5
Sequens	4.20	f	22.29	f	3	Quæ magis in Boream	0.59	f	19.8	f	5
Informis inter velum & lacteam	23.44	f	30.30	f	A 3	Intermediarum duarum præced.	0.12	f	20.51	f	5
<i>Hæ tres trajecit Grünbergerus ad finem Hydra.</i>						Sequens & reliqua de quatuor	1.3	f	20.12	f	A 5
<b>HYDRA.</b>						<i>Finis Catalogi mille Fixarum Tychonis Brahe.</i>					
Præcedens in capite	5.39	f	14.37	f	A 5						
Supra primam ad aquilonem	6.46	f	14.16	f	4						
Borealior in occipite	6.48	f	11.8	f	4						
Quæ tertiam ad austrum præc.	7.22	f	11.36	f	5						
Omnium in capite orientalior	9.0	f	11.1	f	A 4						

Secunda Classis

FIXAS ILLAS COMPLECTITUR, QUAS DE VETUSTO HIPPARCHI CATALOGO, à Ptolemæo repetito & emendato, Tycho omisit. Eas SEMI-TYCHONICAS appellare placet: requisitas enim ex codice Ptolemæi, adhibita etiam versione Trapezuntij, Tubingæ ante annos 76 edita à Schreckenfurio, reduxi ad annum 1600, additione, ad longitudinis loca à Ptolemæo prodita, tanti arcûs, quantum Tycho addidit in aliqua vicinâ clarâ; latitudini vel additis vel subtractis scrupulis totidem, quot quovis loco major fuisse creditur obliquitas Eclipticæ sub Ptolemæo: sic tamen, ut rotundi numeri vicini ratio haberetur.

Præfata autem putavi, Græcum hic textum Ptolemæi propius sequi, quam cum cæteris, Prutenicas, Copernicum, & Alphonsinos, qui Arabicam Almagesti versionem secuti esse videtur; ut hoc pacto conferendi inter se versiones occasionem
